

## NON VACUUM LONG CHAMBER AUTOCLAVE

2560-V S3 A

### PRODUCT DESCRIPTION

## The Vetclave 2560 Long Chamber Model has been designed specifically to meet the needs of your practice.

You have the ability to increase the sterilisation and drying times to suit the load. A very important feature for ensuring all bags and more complex instruments are thoroughly sterilised.

The large chamber size of 30-litre capacity enables larger instruments to be sterilised, this is ideal for equine and large animal instruments. The Instaclave has space for 6 trays. 3 trays are included as well as your hose, drip tray and handle for ease of use. The door gasket can be replaced and the overheat cut out can be reset easily by the user, reducing your maintenance costs and downtime.

#### Why choose a non-vacuum Autoclave?

A non-vacuum autoclave is designed specifically for sterilisation of non-wrapped and solid instruments. It comes with the added benefit of being able to increase the sterilising and drying times to suit the load.

#### Integrated Safety Features

You will always feel comfortable whilst using the Instaclave due to its abundance of safety features. The manual and mechanical door locking mechanism ensures that it cannot be opened whilst sterilising due to the pressure forcing the second lock to engage. Overheating protection and a pressure safety valve are two other features that will guarantee you an easy and safe experience.

#### Key Features:

- Ability to increase sterilising and drying times

- 2 Cycle types
- Larger chamber
- Safety features including manual and mechanical door locks and overheating protection
- Easy to use, clear buttons to switch between cycles, with clear lights to show your selection
- Non recycled water system

Technical Specifications
