

COMPLETE VETSEAL ELECTROSURGERY UNIT

END-VGMS-BUNDLE

PRODUCT DESCRIPTION

The only generator with a fully autoclavable bipolar thermo fusion hand piece

The VetSEAL is an advanced electrocautery generator from the human market, with a fully autoclavable bipolar thermofusion hand piece for sealing vessels up to 7mm. Vessels are permanently sealed without leaving any foreign material, such as sutures, in the body. A seal is achieved when bipolar current is passed through the tissue, causing the collagen and elastins to fuse without carbonisation. Thermo-fusion of vessels with the VetSEAL is fast and secure and can be repeated as many times as necessary during the procedure.

Complete Kit Includes: VetSEAL unit, single bipolar/vetSEAL footswitch, VetSEAL thermocut cable & hand piece, 5 VetSEAL blades.
