

## INFANT DRYLINE II WATER TRAP

IMEC-115-043025-00

## PRODUCT DESCRIPTION

**DRYLINE™ II is a complete water trap subsystem and the ultimate solution to the problems of moisture, humidity and bacteria contamination usually associated with airway gas monitoring.**

The patented design of the DRYLINE™ II water trap ensures virtually unaffected response time in any clinical application for patients up to 3kg during anaesthesia and intensive care.

The sample volume for the infant dryline water trap is 90ml.

### Key Features:

- . DRYLINE™ II interfaces directly to AION™ Platinum Multigas Analyzers and can be easily integrated into any design of gas monitors of any make.
- . Protects the gas analyzer from humidity, mucus and bacteria through 0.45 µm hydrophobic bacteria filter
- . Fail-safe protection of the gas analyzer system by additional self-sealing filters
- . Flow optimized gas sample-path ensures virtually unaffected response time
- . Semi-disposable water trap for use for up to one month
- . Available in versions for adult/pediatric (90 - 200 ml/min) and neonatal applications (70 - 90 ml/min)
- . Fits in receptacle with switches for automatic water trap type identification and pump shut down when water trap is removed
- . Flush or panel mounting options for receptacle
- . Patented design
