

BURTONS K9 GASTROSCOPY TRAINING MODEL

END-TRM1

PRODUCT DESCRIPTION

The Burton's K9 Gastroscopy Training Model has been designed based on a 25-kilo dog, and contains a range of clinical disease states and pathology for veterinarians to investigate.

Made of synthetic material, the model is designed for flexible veterinary endoscopes up to 9.8mm in outer diameter.

Zippered entry enables the introduction/ removal of foreign bodies for retrieval training.

Ideal for Universities, Colleges and Veterinary Endoscopy Training centres, the model is supplied in a hard case with lubricant and can be used with/without the case for teaching purposes.

Anatomically the model is made up of:

- the oesophagus
- lower oesophageal sphincter
- fundus
- cardia
- body
- antrum
- pyloric sphincter
- duodenum

Disease states include:

- ulceration of the lesser curvature and thickened area
- petechial haemorrhage pyloric antrum
- peyers patches
- duodenal papilla
- bile stains
- nodular changes in duodenum
