

GIMA DIATERMO MB 120D MONO-BIPOLAR ELECTROSURGERY UNIT - CLEARANCE

GIMA-MB120D-CL

PRODUCT DESCRIPTION

A HF electrosurgical unit for performing middle monopolar or bipolar electrosurgery.

Includes FREE Autoclavable MB Handle (GIMA-30554)

The modes of operation they provide are pure cut, coagulated cut, forced coagulation, soft coagulation and, with forceps, bipolar coagulation.

The use of either split or normal neutral plate is allowed.

Leading technology enables highly professional surgery intervention thanks to ergonomic, plus safety features derived from high power theatre apparatus.

An open circuit alarm warns the user that connection into the neutral plate has not been made or that the cable is disconnected or the neutral plate is not in contact with the patient. The alarm is signalled by an intermittent beep, together with a flashing red light on the front panel.

OVT alarm: the unit includes an internal circuit protection warning when the current delivery is exceeding.
