

BURTONS AVIAN CAGE - CLEARANCE

XX-1998-CL

PRODUCT DESCRIPTION

Exotic species are becoming more and more popular as pets but require a very different level of veterinary care compared to other small patients. Is your practice equipped for this?

Only suitable for use with bird cage inside

Our new Burton's Avian cage can allow you to offer this increasingly popular service without effecting your regular business.

The Burton's Avian cage is more than just a cage, designed and manufactured exclusively by Burton's for the temporary housing of exotics species with negative pressure extraction, infra-red heating and ultra violet lighting built-in.

The careful design of the cage allows for a standard size bird cage to be placed directly inside without the riggers of removing/re-capturing the patient and allows the patient to remain in a familiar environment, reducing stress. The smart features of the cage greatly reduce the potential of pathogen transmissions from patient to patient, and lowers additional risks of zoonotic pathogens. (Face masks are recommended when opening the door).

Designed from the ground up, this product has been constructed from the latest technology WCB (Waterproof construction board) with 301 grade stainless steel, so you are guaranteed a quiet, low reflection, water resistant, anti-bacterial, long lasting safe place for your patient.

Key Features

Sliding doors for variable air changes - A sliding front cover to the door allows you to increase or decrease the flow of air into the cage and also reduces loss of heat. This has 3 options - One allows maximum air flow in and out of the cage, the 2nd halves the air flow and keeps the heat in and the 3rd leaves you with one hole for pumping in a source of oxygen such as use of a nebuliser.

Extraction - An extraction fan to the rear top of the cage allows any extracted air to be taken straight out of the practice, ensuring no other patients are effected.

Infra-Red Heating -Using the latest infra-red heating technology contact burns are a thing of the past. Providing heat directly to the patient through infra-red waves means you and your patients are safe whilst maintaining a required temperature within the cage.

UVB - Ultra violet lighting - More than just a light, this exotic specific light is essential for your patient, regulating the synthesis of Vitamin D3 in your patient skin and helping to maintain calcium levels.

Ease of use - This 24"W x 42"H x 26"D cage has been designed at the correct dimensions to fit a standard 600mm deep cage inside with no hassle.

What is WCB?

Waterproof construction board is made with a foam core of closed cell PVCU, with a solid PVC surface. It is non-toxic, formaldehydes free, non-porous, recycled, recyclable, resistant to bacteria and completely impervious to liquid.

What is Infra-Red heating?

A revolutionary infrared heating system which runs off a low voltage electrical current and is therefore very cheap to run. Rather than heating the air, it heats the particles by finding moisture, resulting in a more consistent and accurate temperature with a lot less wastage.

Manufactured to last

We don't just supply it! This product was designed and built by Burtons in the UK at our principle manufacturing facility in Maidstone, Kent Using the latest CNC's and laser manufacturing processes and high quality stainless steel materials this product has been manufactured by our team from the ground up to last!

Let us help with the design...

At Burtons, we offer a completely complimentary custom design service, meaning whatever your plan for the room, whether it is to gain ISFM certification or just maximising every bit of space. Our dedicated projects team will use their expert knowledge to complete a design that will be both functional and to specification.

We can arrange for a full site survey or you can simply provide us with your room dimensions and drawings and our projects team will complete a free 3D room design based around your needs.

Installation

If it's a single cage or a new practice setup the easy installation process is straight forward and fast. Once your happy with your order, all our cages are delivered pre-made and ready to go, but if you prefer why not take advantage of our in-house installation team, who can then arrange a suitable time to build your new bank, working with you to minimize disruption.

Polypropylene Avian Cage 24" Wide x 42" High
x 25.7" Deep. Heated With Thermostat Control
. Vented Extraction. UV Light With Protective

Cover & Socket Panel.

ADDITIONAL INFORMATION

Animal	Small Animal
SKU	XX-1998-cl
Colour/Style	White
