

BURTONS EN-V5+ INFUSION PUMP KIT

EN-V5+-BUNDLE

PRODUCT DESCRIPTION

One of the few infusion pumps on the market that can store numerous giving set calibrations in multiple storage slots, now with optional warming!

The Burtons EN-V5+ is an easy-to-use infusion pump for the modern-day veterinary practice. It has the capabilities to store multiple giving set calibrations, meaning you no longer need to buy separate pumps for paediatric, standard infusion and bloods. Impressively, it can store up to 200 calibrations of giving sets.

The Plus version gives you warming options which help you maintain your patients core vitals whilst under anaesthesia, avoiding complications such as hypothermia. The EN-V5+'s large touchscreen and updated software really adds to how user intuitive it is, easily change settings and modes as well as clearly view what the pump is currently doing, including a 'Time remaining' box that allows you to judge when the infusion pump needs checking next.

Its battery will last up to 10 hours when fully charged, allowing you to move it easily between theatre and recovery, a quick and easy Allen key fitting allows you to change over from the infusion pole bracket to the cage mount, both of which are included with the infusion pump.

Your Burtons EN-V5+ will come already calibrated to Burtons Giving Sets, please let us know when you place your order if you would like it calibrated to a different type.

The exclusive Burtons edition kit comes with a pole mount, cage mount bracket and 'L' shaped power lead as standard.

Add Infusion Warming To Your Pump With Ease

Only available for the EN-V5+ Infusion Pump. The pump is compatible with the EN-V5WT warming lead and has a side holster built-in on the side of the unit to hold it. The lead operates up to 40°C to help keep your patient's temperature at healthy levels. The leads generous length allows for improved coverage and heat distribution across the IV giving set. The warming is only operational when running from mains power.

Key Features:

- Store up to 200 giving set calibrations
- Interchangeable IV pole bracket, cage bracket and 'L' shaped power cord included as standard
- Night mode - dims brightness of the screen so it can still be seen clearly but does not shine bright lights into a dark room Less stress for recovering patients.
- Suitable for bloods
- Right angle power lead - keeps leads away from prying paws in cages.
- Parameter settings and editing directly on the touchscreen
- 5 infusion modes + micro mode control
- Infusion rates range from 0.1ml/h to 2000ml/h
- IP44 splashproof
- Case material: PBT+PC
- Infusion Modes: Rate mode, Time mode, Body weight, Drip sequence, Drug library & Micro
- Includes side holster for EN-V5WT Warming Cable on Main Unit
- Software update for the latest model
