

LABCOLD PHARMACY GLASS DOOR FREE STANDING REFRIGERATOR - 340L

124-015-G-CONFIG*

PRODUCT DESCRIPTION

A pharmacy refrigerator featuring the latest Labcold Intellicold technology

Designed for the safe storage of cold chain medicines in line with Public Health England guidance. The 24 range features an enhanced touchscreen controller that delivers accurate timekeeping, intelligent event logging, and Bluetooth connectivity. Providing faster access to temperature data than ever before via the Labcold Connect Android App. No more having to manually upload temperature logs to your practice PC! This flat, easy-to-use controller automatically locks when not in use to prevent accidental changes.

Three independent internal temperature probes provide advanced temperature readings, ensuring that temperature readings accurately reflect the true product conditions throughout the fridge. This provides accurate, meaningful alarms when medicines are at risk. Reducing the risk of oversized or unrepresentative loads causing inaccurate readings. These all include a low-temperature safeguard that prevents freezing.

Each fridge is supplied with a FREE UK 5-year warranty, once registered, for complete peace of mind.

A UKAS Temperature calibration certificate gives you peace of mind that your temperatures are calibrated correctly. It can also be used if any health and safety issues arise around the correct storage of drugs, and can be shown to an auditor during inspections. These certificates can be purchased as an optional extra at time of purchase.

Key features:

- Fitted with the IntelliCold touch screen controller
- 24/7 automatic temperature data logging via Bluetooth (Labcold Android App)
- Event based logging
- Fan assisted cooling
- Door lock options - key lock with two keys, or digital lock
